

PLEASE READ BEFORE USE... THANK YOU

Thank you for selecting a SHADETREE ENGINEERING & ACCURACY Rest Base. This base has been designed for F-Class type shooting. As it seems that F-Class type shooter people seem to travel a lot the base was designed to be light weight and to breakdown for ease of packing. Of course you don't have to be an F-Class shooter to use this rest. Anyone interested in a quality lite weight rest should find this rest a great addition to his or her shooting tools. As you assemble it be sure the machined flats are on the top surface of the legs. The legs are threaded with .375-16 threads so you can install leveling posts of your choice. Now go and enjoy yourself and we hope you shoot good groups!
